

Agenda 21 – How Would You Like to be Forced into a Human Habitat?

Published **6 years ago** on **March 11, 2014**

Agenda 21 is the blueprint for a global communist dictatorship, tying together many aspects of the NWO: depopulation, smart meters, surveillance, transhumanism and microchipping.

Agenda 21 is approaching.

Communism is coming to America and the world, this time cloaked in green, not red. Private property is under attack. Land is being grabbed by stealth. The US Federal Government is claiming control over more and more land, and kicking rightful owners off their property through the use of Eminent Domain, a law letting the Government take land anywhere (and usually by undercompensating the owners too). The Government (through its numerous agencies like the EPA) is also laying claim to all waterways (including small streams) in America. Cunningly, all of this is being sugar-coated and done in the name of sustainability, “saving the environment” and with the use of other nice-sounding PR terms like smart growth. That’s right; the **United Nations’ communist Agenda 21** has arrived, and green is the new red.

What is Agenda 21?

So what is [Agenda 21](#)? It is the global scheme being implemented in America and elsewhere to place concentrated power in the hands of a few central planners, who will then decide in a top-down fashion where everyone will live, where they can go and where they will be forbidden from entering. It plans to create “non-human zones” where ordinary people will never be allowed to set foot (but there will be one rule for the masses and another rule for the elite). Around these non-human zones will be placed buffer zones. Then, in the little bit of land left, there will be a dozen or so mega-regions – **human habitats** – with incredibly high population density. These will become smart cities, with mass transit (instead of cars), high rises and people stacked up on top of each other in tiny box-sized apartments. You will be asked to “need less” and accept living in a cardboard box, all for the supposed sake of the Earth – while the elite administrators live in their mansions out of sight in another “sector”. Agenda 21 even contains plans for the Government to decide whether you own a car, whether you can grow your own food and what materials your dwelling will be made of!

But that's not all: Agenda 21 is the master plan behind the [smart deception](#). In planned smart cities, [smart meters](#) will be prevalent, cameras will be everywhere and everyone will be under constant surveillance 24/7. Eventually the plan is to link all machines, appliances and devices to a smart chip or microchip which the elite want you to have embedded under your skin. This chip will be necessary for you to access money, food, transport, entry to your dwelling and buildings, etc., but it will also be subject to remote control from authorities. Humans will become mere automatons, nodes on a massive smart grid, thus fulfilling the ambitions of the [transhumanism](#) agenda.

This isn't conspiracy theory; it's conspiracy fact. Recently a [Colorado woman lost custody of her son](#) for speaking out against Agenda 21. This tyrannical plan is being carried out as we speak.

Agenda 21's Club of Rome Origins

Agenda 21 came onto the world stage at the 1992 Rio Earth Conference, and has its origins at the Club of Rome, one of the Round Table think tanks and secret societies that run the world, alongside the CFR (Council on Foreign Relations), the Trilateral Commission and the Bilderberg Group. The Club of Rome decided the best way to achieve world government would be to devise a grand global threat with which to scare the whole of humanity, and it came up with the idea that mankind itself was that threat. This quote is from their 1991 report, *The First Global Revolution*: "In searching for a common enemy against whom we can unite, we came up with the idea that pollution, the threat of global warming, water shortages, famine and the like, would fit the bill. In their totality and their interactions these phenomena do constitute a common threat which must be confronted by everyone together ... all these dangers are caused by human intervention in natural processes, and it is only through changed attitudes and behavior that they can be overcome. The real enemy then is humanity itself."

Of course, this kind of thinking is utterly insane. There is nothing wrong with human beings living on Earth. The real problem is the deluded mindset which is in all of us, but which runs the show in the minds of our possessed leaders; the same mindset whose greed has no limits and which is utterly without compassion or empathy. However, the elite instead pretend the mass of humanity is the problem, spouting their propaganda that we should feel guilty just for breathing out carbon dioxide. As the Club of Rome admitted, the idea of man-made global warming was contrived to control humanity and is part of the junk science of Agenda 21. More than [1,000 dissenting scientists](#) from around the globe have now challenged the [man-made global warming claims](#) made by the United Nations Intergovernmental Panel on Climate Change (IPCC) and have busted its credibility.

Agenda 21 is the blueprint for a global communist dictatorship, tying together many aspects of the NWO: depopulation, smart meters, surveillance, transhumanism and microchipping.

Agenda 21's "Sustainable Development" – Sounds So Good, Right?

The insidious thing about Agenda 21 is that its very cleverly hidden. At first glance, who would object to the idea of cleaning up the planet, living in better harmony with Nature and living more smartly and sustainably? Yet, as with many aspects of the global conspiracy, you only get the truth if you look past the veneer and dig beneath the surface. It turns out that the elite have their own meaning for each of their key terms. They state in their documents that sustainable does not mean self-sufficient, and they explicitly define things they deem not sustainable: ski runs, grazing of livestock, plowing of soil, building of fences, industry, single family homes, paved and tarred roads, logging activities, dams and power line construction. These are all targeted to be banned, and yet life without some of them would mean a return to the Stone Age!

The whole foundation of sustainable development according to Agenda 21 is a **world without private property**. This is the [1st plank of the Communist Manifesto](#). Using a mixture of half-truths, it claims in its documents that "land ... cannot be treated as an ordinary asset, controlled by individuals and subject to the pressures and inefficiencies of the market. Private land ownership is also a principle instrument of accumulation and concentration of wealth, therefore, contributes to social injustice."

While it's true that our current society is full of wealth and power inequalities, getting rid of the ability to own your own land, and putting all land on Earth into the hands of elite bureaucrats to distribute as they see fit, is definitely not the answer. That's a recipe for tyranny, and once again, whether it's Obamacare, gun control or Agenda 21, it all boils down to the same distorted idea: **collectivism**.

Agenda 21 is Pure Collectivism

To revisit, collectivism is the idea that the group is superior to the individual, and that the abstract needs of the group should come ahead of the concrete needs of the individual. It sounds all fine and dandy in theory, and to some degree an individual must sacrifice some of his desires to work harmoniously in a team or live harmoniously in a community, but that's not what this is all about. Whenever collectivism is applied to politics, it becomes Marxism, Socialism or Communism, and horrible results ensue. The individual becomes nothing. The State becomes everything. Power gets concentrated in a tiny percentage of hands (like a Central Committee) who become the new ruling elite. They claim to represent everyone and manage affairs and wealth distribution for the good of all, but in reality they become unaccountable tyrants who force their will on anyone who stands in their way.

Agenda 21 is entirely and utterly collectivist. It's a global communist scheme aiming to create a hierarchical One World Government (Global Governance or the New World Order) with the power to control everyone's behaviors, habits and lives. It goes against everything in the Constitution relating to individual rights and freedoms. It goes against the Declaration of Independence and everything Americans fought for in the late 1700s to become a free republic.

An important thing to note is that Agenda 21 is not a treaty. It was never ratified by the US Senate. Therefore, it is not the law of the land. Agenda 21 is "soft law" or policy which covertly influences a country's legislation at all levels, national, state and local. Not only does it give the appearance of being

green, but it also gives the appearance of being local, when in fact it is being orchestrated globally through ICLEI (International Council for Local Environmental Initiatives), as exposed by [Rosa Koire](#).

Agenda 21 Ties the NWO Together: Depopulation, Smart meters, Surveillance, Transhumanism and Microchipping all wrapped up in a Global Communist Dictatorship

In conclusion, Agenda 21 is a grave threat to humanity, and a very dangerous one because it is so well hidden. It ties together so many aspects of the global conspiracy, including depopulation, smart meters, surveillance, transhumanism and microchipping, all wrapped up in a global communist dictatorship. However, despite all this, it can be stopped.

The situation we're facing now is reminiscent of what it must have been like for the Native American Indians when white man arrived. Those who escaped being killed were forced off their land into reservations. Try substituting the New World Order elite for white man, the mass of ordinary Americans for the Indians and human habitats for Indian reservations, and you may get a clearer glimpse of the predicament we're in. It's time to stand up, be strong and take action before this scheme gets too far advanced.

The solution is to look beyond the nice-sounding environmental language and realize that the green movement has been hijacked. We need to reject the calls, coming from a rich elite, that "we must live on less" while they secretly plot to take all the good property and houses on the planet and leave the masses squashed in shoebox apartments in smart cities. Take action locally, e.g. by ensuring your local council is not being fooled by ICLEI Agenda 21 policy. Use the resources at [ToolsForFreedom](#) to educate yourself (e.g. the "[Agenda 21 Land Grab Package](#)"), and then tell everyone you know about the threat to our sovereignty. Call us and we will provide free catalogs to anyone. Raising widespread awareness is a big part of halting Agenda 21.
